## **DETAILED ACTION**

### ***Status of Claims***

1. This communication is responsive to RCE amendment filed on May 29, 2007, where applicant cancelled claims 1,13,19,39,57. Claims 1,6-11,13-81 are pending.

### ***Response to Arguments***

2. Applicants amendment and arguments filed 5/29/2007 are persuasive and therefore the previous rejections are withdrawn.

### ***Allowable Subject Matter***

3. Claims 1,6-11,13-81 are allowed.
4. The following is an examiner's statement of reasons for allowance: Applicants invention of employing a specific type of credit information for controlling transmission of data from a sending node to a receiving node, is found to be patentable. Prior art references found to be pertinent to Applicants disclosure (particularly Patent Numbers: 4,841,526, 5,633,867, 5,825,748, 5,852,602, 6,243,358 6,337,865), either only teach minor aspects of the invention or only teach the general environment of the invention. The prior art, neither singly or in combination, do not teach the claim limitations.

The particular novel feature of the invention (as mentioned in the claims) is the type of credit information used in a credit-based flow control system and method where a receiver sends credit information to a sender so that the receiver can control the transmission of data that is sent from the sender to the receiver. The credit information that is sent to the sender specifies a beginning and an ending of a unique range of data that is to be sent from the sending node to the receiving node.
